SYSTEM WARRANTY*:
Solar modules production: 25 years
Module support structure: 25 years
Inverters: 5 years standard, (extendable to 25 years)
Battery: 1 year (life 10 year)

Quality of Components:
Manufactured in EU.
All components in the kit are high quality with CE standard

Description
SITECNO solar kits for hybrid system with diesel generator, batteries and grid are complete solutions which also provide energy in all unforeseen situations that may lead either by time, by circumstances of outage and any situation. It is a complete solution for saving your energy costs and fuel.
Kits advantages
- Easy to organize the order through a unique code and provider
- Compatibility between all components secured
- Measurement of energy flows installation
- CE Highest quality components
- Support pre (Combiner Box) enclosures configured to facilitate mounting installation.
- Possibility of dimensioning variants references listed kits for other power settings (on request)

Function of the system
1. The place uses the solar energy produced by photovoltaic modules during the hours of sun, plus the excess energy store in the batteries.

2. The grid is second choice after solar energy and the first choice for the night. In the absence of solar energy, either by night or unstable climate. The surplus energy will stored in batteries and grid.

3. The battery is a third option, when grid is unstable, the load consumes energy from the batteries.

4. The diesel generator is the last option when the load does not get solar energy, batteries do not have enough stored energy or are empty, and there is load shedding in the grid. In these situations the location consumes energy from diesel generator and also charges the batteries.

Modular system
These systems are module type and can be installed as per your space and requirement. You can ask for additional services as state-of-the-art designing, drawings, engineering and installation of your projects.

Solar kits with modular system can be extended to MW projects

Solar Kit Applications:
- Schools
- Restaurants
- Gymnasium
- Electric vehicle charging stations
- Gardens
- Markets
- Administration buildings
- Hospitals
- Resorts
- Service centres
- Multi story buildings
- Shopping malls
- Hotels
- Scout camps
- Petrol Stations
- Parking Areas
- Old houses
- Public service offices

Additional Accessories
You can ask for additional accessories for extension at your installation or shifting of your system to another place.

Installation Training Services
Training of installation is offered for technical persons on time to time basis. Schedule of the training session announce on web site.

Operation and maintenance services
Operation and maintenance services offered for the valued customers for efficient operation of the system. Customers may ask for the O&M service contract with the company.

Monitoring services
In order to monitor solar power systems, data can be transmitted to remote locations. For communication between the solar inverter and monitoring devices, SITECNO provides two basic choices: Wireless or Blue-tooth and wired variants.
Polycrystalline Solar Module 250W

SITECNO Solar Photovoltaic Panels stand for quality, durability and most importantly, high performance. Our experience, capacity of research, continuing development and improvement have turned us into a company recognized in the sector by the high value offered to our clients.

Due to their engineered hollow section frame and its 4mm special textured glass with AR coating, SITECNO modules meet the maximum demands with regard to stability and corrosion resistance.

Thanks to their high performance SITECNO modules are prepared for changes in legislation. These panels will produce 5% more than any other of the same features.

The performance warranty is for 25 years, after 12 years, modules still produce a minimum 90% of their nominal performance. After 25 years module still produce a minimum 80% of their nominal performance.

Temperature Coefficients:

| Nominal Operating Cell Temperature (NOCT) | 25°C ±2°C |
| Temperature Coefficients of Pmax         | -0.43% / °K |
| Temperature Coefficients of Voc          | -0.31% / °K |
| Temperature Coefficients of Isc          | 0.04% / °K  |
| Operating Temperature                    | -40 °C to +85 °C |
| Maximum System Voltage                   | 1000V DC    |
| Reverse current load                     | 15A         |
MORE EFFICIENT
THANKS TO ITS 750 V DC INPUT VOLTAGE
Electrifying detail: Thanks to the higher, 750 volt maximum DC input voltage, often times one less module string is needed because more modules can be switched on in a series.
- Highly flexible design reduces cabling requirements
- Maximum efficiency of 97 percent ensures top solar yield

MORE FLEXIBLE
THANKS TO MULTI-STRING TECHNOLOGY
Greater flexibility in planning, implementing and solar harvest: The advantages of multi-string technology in the new transformerless Sunny Boy are also available in the 3 kW model.
- Optimal yield in partial shading and efficient operation of east/west arrays
- Two MPP trackers with expandable OptiTrac® Global Peak operational control
- Optional: Single Tracker for complex or simple roof structures or as an add-on to existing PV plants

EASIER
THANKS TO INNOVATIV MOUNTING CONCEPT
The wall mount has also been redesigned, and now allows you to attach the inverter easily by inserting it from above.
- Fast and professional attachment, even on walls that are not completely straight
- Popular anti-theft protection option available

UNIVERSALLY APPLICABLE
THANKS TO INTEGRATED GRID MANAGEMENT
Intelligent controls offer advantages in every situation: Thanks to its integrated grid management functions, the new Sunny Boy with Reactive Power Control offers universal deployment options and contributes to grid support.
- Fewer disconnections from the grid thanks to voltage reduction via reactive power
- Increased plant profitability

Input (DC)
Max. DC power (@ cos φ = 1) 3200 W
Max. input voltage 750 V
MPP voltage range / rated input voltage 175 V ... 500 V / 400 V
Min. input voltage / initial input voltage 125 V / 150 V
Max. input current input A / input B 15 A / 15 A
Max. input current per string input A / input B 15 A / 15 A
Number of independent MPP inputs / strings per MPP input 2 / A:2; B:2

Output (AC)
Rated power (@ 230 V, 50 Hz) 3000 W
Max. apparent AC power 3000 VA
Nominal AC voltage / range 220 V, 230 V,
AC power frequency / range  
50 Hz, 60 Hz / -5 Hz … +5 Hz

Rated power frequency / rated grid voltage  
50 Hz / 230 V

Max. output current  
16 A

Power factor at rated power  
1

Displacement power factor, adjustable  
0.8 overexcited … 0.8 underexcited

Efficiency  
Max. efficiency / European weighted efficiency  
97 % / 96 %

Protective devices  
DC disconnect device  ●
Ground fault monitoring / grid monitoring  ●/○
DC reverse polarity protection /  
AC short-circuit current capability /  
galvanically isolated  ●/○
All-pole-sensitive residual-current monitoring unit  ●
Protection class (according to IEC 62103) / overvoltage category (according to IEC 60664-1)  I/III

General data  
Dimensions (W / H / D)  490 / 519 / 185 mm (19.3 / 20.4 / 7.3 inches)
Weight  26 kg (57.3 lb)
Operating temperature range  –25°C … +60°C (-13°F … +140°F)
Noise emission (typical)  25 dB(A)
Self-consumption (night)  1 W
Topology  Transformerless
Cooling concept  Convection
Degree of protection (according to IEC 60529)  IP65
Climatic category (according to IEC 60721-3-4)  4K4H
Maximum permissible value for relative humidity (non-condensing)  100%

Features  
DC connection / AC connection  SUNCLIX / Spring clamp terminal
Display  Graphic
Interface: RS485, Bluetooth, Speedwire/Webconnect  ●/-/○
Multi-function relay / Power Control Module  ●
Warranty: 5 / 10 / 15 / 20 / 25 years  ●/-/-/○/○
Certificates and approvals (additional on request)  AS 4777, C10/11, CE, CEI 0-21, EN 50438¹, G59/2, G83/1-1, IEC 61727, MEA4, NRS 097-2-1, PEA4, PPC, PPDS, RD1699, RD 661, UTE C15-712, VDE-AR-N 4105, VDE0126-1-1

● Standard features  ○ Optional features — Not available, Data at nominal conditions.
SUNNY ISLAND 3.0M

The custom-fit solution for on-grid and off-grid The Sunny Island 3.0M support a wide range of on-grid and off-grid applications, and both systems have a number of compelling product features. Users benefit from SMA’s over 25 years of experience with battery inverter technology. Its high protection class, wide temperature range and overload capacity provide the kind of reliability needed for off-grid use. Intelligent load and energy management keeps the system running even in critical situations. And being a core element in the SMA Flexible Storage System for new and existing PV systems, the Sunny Island system stores generated solar power and works with the Sunny Home Manager to intelligently manage home energy consumption. The quick configuration guide and intuitive user interface help ensure quick and convenient commissioning in any both cases. The new Sunny Island 3.0M system are the perfect product solutions for stand-alone and grid-connected systems in a power output range of up to 13 kW.

- SI3.0M-11
SOLAR BLOC BATTERY

Solar bloc valve regulated lead-acid batteries for cyclic applications

Your benefits with HOPPECKE solar.bloc

Maintenance-free regarding water refilling - due to Absorbent Glass Mat technology
Optimized cycle stability - due to optimized electrode design for efficiently change current acceptance
OPTimum operational saftey - integrated backfire protection and central degassing system
High short-circuit saftey even during the installation - based on HOPPECKE system connectors

Typical applications of HOPPECKE solar.bloc

Solar Off-grid applications
Power supply for remote off-grid applications and isolated power networks, solar home systems, solar street lighting, health care facilities

Storage for direct consumption of photovoltaic (PV) energy

Telecommunications
Mobile phone stations, BTS-stations, Off-grid/on-grid solutions

Traffic systems
Signalling systems
Lighting

Type of Battery: Solar.bloc
Standards: IEC 60896, IEC 61427, DIN 40744
Capacity Range: 150 AH
Normal Voltage range: 12V
Container Material: PP, talcum
Grid alloy (+ive, -ive): Pb + <1% Ca
Plates (+ive, -ive): Grid, Grid
Electrolyte: H2SO4, AGM
Application: Solar
Connector design: bolted connector
Design life up to: 10 years
Cycles up to: 800
Operating temperature: -20°C to +40°C

Size: LxWxH: 498mm x 177mm x 230mm
Weight: 55 Kg
ACCESSORIES

**Design**
- Modular type: Aluminium
- 25 years warranty
- Tamper proof nut bolt
- 100% recyclable material
- A2 Stainless steel bolts
- Weight: 2.49kg/m
- Loads: wind, snow
- Test certificate: CE Certifies

**Cable:**
- Model: SI-MC4-F
- Rated Voltage: TUV 1500V DC / UL 600V DC
- Rating Current: 20-30A
- Cable Size: 2.5-4.0-6.0, 10-12-14AWG
- Proof Voltage: TUV 1500V AC, 1 min
- Protection Class: Class II
- Temperature Range: -40 to 85ºc
- Flame class: UL94-V0

**Connector:**
- Flexible conductor, class 5
- Maximum service temperature: 120ºC
- Estimated lifetime: 30 years.
- UV Resistant
- UV Resistant
- Grease & mineral oils resistance: excellent
- Grease & mineral oils resistance: excellent

Support structure
Cable with connector
Cable connector MC4
INSTALLATION APPLICATION

- Instant self-consumption system with feed in grid (on grid)
- Instant self-consumption system without feed in to the grid (on grid)
- Solar system hybrid compatible with diesel generator (on grid)
INSTALLATION APPLICATION

- Instant self-consumption system (off grid)
